

A V(ma) Simple Voting Matrix Example

This is the Voting Matrix hierarchical Criteria Outline.

It can be collapsed or enlarged using the outline controls in the upper left hand corner

This column is used when one is entering numerical performance unit values rather than scores. A "min" or a "max" or number in a cell in row 20 means best score is (1) a positive number or "max" meaning largest data value gets the highest score or (2) neg number or "min" meaning smallest is best.

These are the vote columns for the Importance Weights of the vectors.

And this is the Weight Grades Tallied column

Here is where numerical or symbolic scores or numerical units are entered for each Grade column

A grade column with "CuCol" (Conv unit Col) in cell 20 means that column's vote data should be numeric units instead of scores.

These are the Decision Options columns, all of which will be loaded into the grade columns of
